PIVOT DRYSUIT

“If it ain’t broke, don’t fix it,” is not a phrase our product designers use. Even the best pieces of gear have room to improve, and tinkering often leads us to advancements we never foresaw. When we tried moving the zipper on our tried-and-true Crux Drysuit to the back, the result—appropriately named the Pivot—became the go-to suit for many of our employees and team paddlers. It’s easy to put on and zip up solo—easier than many front-zip suits. And with the business end of the suit in the back, you get free-flowing performance and comfort up front, whether you’re seal launching into a committing run, setting up for that can’t-miss boof or bushwhacking the far right line. NEW FROM THE INSIDE OUT

Our 2017 wetsuit line marks the culmination of a years-long effort to bring the comfort, performance and appearance of neoprene up to the level of the finest technical outerwear. Using newly available technologies, design insights and construction methods, we've advanced the timeless utility of neoprene to meet the modern paddler.

In recent years, dry suits and drytops have grown steadily more effective and affordable, leaving many paddlers to forget about that old farmer john in the closet. But neoprene still offers advantages that dry wear cannot. It not only provides the best thermal protection for the buck, but it's versatile, easy to swim in, softens impacts with rocks, and even provides extra flotation.

Beginning with our flagship model, the Radiant, we've reimagined wetsuits from the inside out. Every seam is fine-tuned for comfort and freedom of motion, and we've employed the finest new materials and technologies to make the suits as capable as they are cozy and comfortable.

See our full 2017 wetsuit lineup at **nrs.com**.

RADIANT WETSUITS

NRS wetsuits are changing the way paddlers think about neoprene with comfort, protection and performance to rival the best technical outerwear. Our Radiant series gives you maximum warmth without sacrificing mobility. Four-way-stretch PowerSpan™ material allows for unrestricted movement, while fully taped internal seams reduce water entry and improve comfort. They also feature an easy-entry chest zipper, water-shedding smooth-skin torso and a soft checked fleece lining. Designed for men and women in both 4/3 and 3/2 millimeter thicknesses. [Imported]

HYDROSKIN

When your clothing is adaptable, you're adaptable—to conditions, situations, opportunities. HydroSkin® gives you the freedom to adapt, so you can go paddle when others go home. Only HydroSkin offers a range of options between wearing no immersion protection and wiggling into a wetsuit. Three neoprene thicknesses from 0.5 mm to 1.5 mm and a variety of tops and bottoms let you layer to match the weather and water, while paddler-specific designs ensure friction-free comfort and freedom of motion. CRUSH

We wanted a shoe we could wear day in, day out, on and off the water. A shoe that the off-duty guide/safety boater/instructor/bartender sleeping on our couch would covet. It had to feel as good as it looked and perform as well as it felt—in the boat, on the SUP board, around camp or at the pub. We made the upper breathable, quick drying and tough enough to last a nonstop season. We gave it a crushable heel and tuned the interior for barefoot comfort. Then we chose the stickiest rubber we could find, siped it for even better wet traction, and stamped our Idaho soul onto the sole. [Imported]
